- Personal Portfolio - <https://danielpruitt.github.io/Portfolio>
- LinkedIn - <https://www.linkedin.com/in/daniel-pruitt/>

PROJECTS

- Moodify - <https://danielpruitt.github.io/Moodify/>
 - Moodify is a project that highlights the use of a CSS library, the Imgur, Kairos, and Spotify API. The web app takes user input from a search query or picture to return playlists based off their mood.
- GiphyApi - <https://danielpruitt.github.io/GiphyApi/>
 - The GiphyApi page uses an input to search for gif files related to movies. This assignment highlights the use of AJAX calls, jQuery, and Materialize.
- Liri-Node-App - <https://danielpruitt.github.io/liri-node-app/>
 - Liri Node App is a CLI application that was built to demonstrate the usage of Node and different Node packages. A link in the readme has a link to the demonstration of Liri.
